Trading Catalysts

Navigating the AI disruption selloff

US Economics: 4Q GDP, FOMC meeting minutes

The key events are the advance estimate of 4Q GDP (Fri), where we expect a solid 2.2% print supported by a healthy consumer, and Dec personal income and outlays (Fri). Jan FOMC minutes out Wed, PCE on Fri, Fed speak on Tue and Thu (full list in Exhibit 11).

Fund. Equity: AI selloff overdone for BKNG, DASH, CDNS

BofA analysts note the pullback could be overdone for some names reporting this week well positioned to manage AI risks. Justin Post's estimates are close to Street for **DASH** (Feb 18). He sees limited AI risk given strong courier, restaurant, and sub. network. For **BKNG** (Feb 18), he expects a healthy 4Q print, with the stock positioned for upside on strong intl./FX tailwinds. AI risks can be mitigated thanks to proprietary user data, supplier relationships, and loyalty benefits. For **CDNS** (Feb 17), Vivek Arya has sales estimates slightly below consensus but thinks fundamentals are resilient, AI acts as an enabler rather than a disruptor. *Note that the BofA Desk has several baskets that could potentially be exposed to the shifting AI disruption risks, including Application Software (MLUSAPP Index) and Internet Applications (MLUINTER Index), *Note: MLUSAPP and MLUINTER are proprietary baskets that are structured and maintained by BofA Securities trading desk.*

Eq. Strat: Mat. & Energy on AI Capex, Staples on afford.

US strategist Savita Subramanian likes materials & energy for AI capex exposure after strong AI guidance (Tracker) and staples on affordability measures (Strat Snippet). If exposure to new themes like ISM inflection, AI adoption, affordability, are funded by current positions, well-held TMT is the likeliest source of funds (note). Another near-term theme: retail-driven equity participation could continue amid elevated tax refunds. See SMID Factors for small caps with high retail participation, and BofA trading desk's Retail Investor Participation (MLRETAIL Index) for large cap names. **Note: MLRETAIL is a proprietary basket that is structured and maintained by BofA Securities trading desk.*

Derivs: Fragility, dispersion, BTD; bubble below surface

While the recent laggard performance of US tech (especially software, Exhibit 4) vs other sectors may appear antithetical to an AI bubble, our derivatives team finds such dispersion as an indicator of bubble-like behavior, where investors constantly re-assess the winners & losers of the AI race and drive instability and fragility.

Prime Fin: AI disruption risks push for more value rotation

BofA Prime Financing Desk (nor part of Global Research) notes AI disruption narrative is spreading quickly, with downturns in many industries such as software, financial svcs, and market data. This downturn is making shorts (which have a growth bias) work again after difficult start of the year. The risk is fore more long de-grossing and value rotation.

The week ahead: all eyes on 4Q GDP and December PCE

The key events this week are the advance estimate of 4Q GDP, where we expect a solid 2.2% print supported by a healthy consumer, and December personal income and outlays (see preview below), both on Fri. We also get durable goods orders, housing starts and IP on Wednesday, trade balance and pending home sales on Thursday and S&P PMIs and UMich sentiment on Friday. The Jan FOMC meeting minutes will also be published on Wednesday, and we'll hear from Barr and Daly on Tuesday, and Bostic, Kashakri and Goolsbee on Thursday.

December PCE preview: few signs of cooling

We expect personal spending rose by 0.4% m/m in December, but much of this is due to our forecast for PCE inflation to rise by 0.3% m/m (2.8% y/y). So real spending should be little changed on the month after a series of strong prints. We also forecast flat personal income growth based on the December jobs report. Core PCE inflation, meanwhile, likely rose by 0.4% m/m, which should leave the y/y rate elevated at 3.0%.

January retail sales preview: weathering the storm

January total card spending per HH, as measured by BAC aggregated credit and debit card data, was flat on a m/m SA basis with large declines in gas and department stores, most likely due to Winter Storm Fern. But online retail and electronics saw solid gains. On net, we think the January BAC card data were encouraging given the scope of the storm. We expect -0.1% & +0.6% for retail sales ex-autos & the control group on the back of favorable seasonals (see: BofA on USA: Jan retail sales: weathering the storm report for methodology, limitations, and disclaimers related to BAC aggregated credit and debit card data).

Fund Equity: BKNG, DASH, CDNS

Doordash

Justin Post
BofAS
justin.post@bofa.com

DoorDash (DASH US) reports February 18th. Our estimates for 4Q GOV/rev./EBITDA are close to Street and we think healthy online shift and fast-growing retail can more than offset soft restaurant sector trends and see GOV upside potential. For 1Q, our margin outlook midpoint is below the Street, but expectations are already low.

We see limited AI risk for DASH given strong courier, restaurant, and sub. network. See our DoorDash preview.

Booking.com

Justin Post
BofAS
justin.post@bofa.com

Booking.com (BKNG US) reports on February 18th. We expect healthy 4Q prints for Online Travel Agencies vs expectations, with Booking best positioned for upside on strong international/FX tailwinds. See our Internet/e-Commerce report.

While big-tech AI agents pose disintermediation risks, OTAs can leverage deep supply relationships, loyalty ecosystems, and first-party data to offer competitive Agentic tools. We think Booking is well positioned with suppliers, with less than 10% large chain hotel exposure. Booking can mitigate AI risks by leveraging: a) proprietary user data, b) supplier relationships (>50% of room nights direct linked to Booking, hard for AI agents to get links), and c) Genius loyalty benefits (>50% of bookings) to build competitive agentic AI capabilities. See our report AI related selloff creates buying opportunity, upgrade to Buy (Nov 2025).

Cadence Design Systems

Vivek Arya
BofAS
vivek.arya@bofa.com

Cadence Design Systems (CDNS US) reports on February 17th. We expect its initial CY26 sales outlook to be set at ~$5.9bn, up around ~12% YoY, somewhat below consensus at $5.94bn, up 12.5% YoY, in line with CDNS historical style/conservatism (especially around 6+ months out hardware-related sales). We expect recurring sales to stay in the ~80% range with flattish/modestly up China and consistent upside during CY26 from hardware and IP.

We believe the pullback in CDNS creates a particularly attractive buying opportunity given resilient fundamentals and AI acting as an enabler rather than a disruptor. No near-term AI substitute exists for highly specialized, workflow-embedded EDA platforms. With ~80% recurring revenue, EDA vendors offer durable exposure to rising silicon complexity across cloud/edge AI, robotics, digital twins, and advanced driver assistance systems. See the report: US Semiconductors: The case for EDA and why we won't "vibe code" a $1bn chip anytime soon.

Historic levels of dispersion, especially within tech

While the laggard performance of US tech vs other sectors may appear antithetical to a bubble, we find such dispersion as an indicator of bubble-like behaviour. Indeed, elevated dispersion has been a hallmark for bubbles in the past, and today's historically elevated level of S&P vol dispersion has only been surpassed by the dotcom bubble in the past 30 years (Exhibit 2). Moreover, under the hood, returns dispersion of S&P tech stocks now sits in its top decile since 1995 (also only surpassed by the dotcom bubble; Exhibit 3), as investors constantly re-assess the winners and losers of the AI race, ultimately driving bubble-like instability. The recent divergence in performance of semiconductors and software stocks is perhaps the starkest such re-assessment yet (Exhibit 4).

See rationale, risks and summary of open trades in the latest Global Equity Volatility Insights.

Exhibit 2: S&P vol dispersion, another bubble signature, has continued its climb higher, with current levels only surpassed by those in the dotcom bubble

Earnings Options Screens

Starting from the universe of Russell 1000 stocks expected to report earnings from Feb 17-20, we screen the stocks based on:

- *Option-based measures*: how expensive vs history are calls and puts expiring on the Friday after earnings
- *Fundamental measures*: how this quarter's BofA EPS estimates compare to the Bloomberg consensus (which is predictive of subsequent stock returns; see Quant Profiles report)
- *Positioning measures*: how heavily owned or shorted the underlying stocks are (for more on long only ownership data see Active managers' holdings update report)

The first screen (Exhibit 5) focuses simply on option-based measures, screening the stocks purely by how cheap or expensive option prices are compared to (i) the stock's reaction during its last 8 earnings releases and (ii) option prices during the last 3m (since the last earnings release).

We then produce screens for Long Calls, Long Puts, Short Calls, and Short Puts (Exhibits 6-9). The inputs for the screens include option-based measures, but also incorporate fundamental and positioning indicators that may be relevant for the possible direction of the stock and magnitude of its reaction post-earnings.

For more details on the construction of each variable and score, see the Methodology section.

Exhibit 5: Implied vol screen: Companies rank higher if they have low implied moves and straddle premiums vs history
The companies are ranked by how cheap it is to own options to position for a potential earnings surprise

Ticker	Company Name	Report Date	Implied move	Implied move vs history[a]	Earnings straddle premium[b]	Implied vol Score

Source: BofA Global Research, Bloomberg, FactSet. Data as of 13-Feb-2026. The column "earnings straddle premium vs 3m avg." compares the current cost of next week's straddle with the average cost of the weekly straddles over the last 3m. Fund holdings as of 31-Dec-2025.

BofA GLOBAL RESEARCH

Methodology

Starting from the universe of Russell 1000 stocks expected to report earnings from Feb 17-20 (and which have listed weekly options), we rank the stocks based on:

- *Option-based measures*: how expensive vs history are calls and puts expiring on the Friday after earnings
- *Fundamental measures*: how this quarter's BofA EPS estimates compare to the Bloomberg consensus
- *Positioning measures*: how heavily owned or shorted the underlying stocks are

To be included, stocks must have weekly options that trade on average more than $1 million notional per day.

Stocks rated Buy/Neutral by BofA fundamental analysts are included in the Long Calls and Short Puts screens. Stocks with BofA Underperform ratings are included in the Short Calls and Long Puts screens.

The inputs to the screens are the following:

- **Option-based measures:** how cheap or expensive options are going into earnings.
  - *Implied move vs history:* A stock's implied move around this quarter's earnings release, compared to the realized moves on earnings days in the last 8 quarters (or however many quarters a stock has been listed for, if less than 8). Realized moves are the 1-day moves from the close prior to the earnings announcement to the following close.
  - *Earnings straddle premium:* The cost of a straddle expiring Friday of earnings week, compared to the average cost of that stock's weekly straddle over the last 3 months
- **Fundamental BofA estimates:** how the stocks' BofA EPS estimates compare to other firms' estimates (Bloomberg consensus).
  - The BofA EPS Score column is formatted such that a higher number yields a higher ranking. In other words, a high BofA EPS vs consensus yields a higher ranking in the Long Calls and Short Puts screens, and a lower ranking in the Long Puts and Short Calls screens.
- **Positioning measures:** how heavily owned or shorted the underlying stocks are.
  - *Fund holdings:* A stock's average weight in fund holdings (from 13F reports, compiled by FactSet), relative to stocks in both the same sector and the Russell 1000 index (average of the two)
  - *Short interest:* A stock's estimated short interest as a percentage of float (reported with a 2-day lag), relative to stocks in both the same sector and the Russell 1000 index (average of the two)

The scores for each category and the aggregate score are computed as follows:

Options Score:

- **Long calls:** average[-(Implied move vs history), -(Earnings straddle premium)]
- **Long puts:** average[-(Implied move vs history), -(Earnings straddle premium)]
- **Short calls:** average[+(Implied move vs history), +(Earnings straddle premium)]
- **Short puts:** average[+(Implied move vs history), +(Earnings straddle premium)]s

BofA EPS Score:

- **Long calls: +** BofA EPS estimates vs consensus
- **Long puts: -** BofA EPS estimates vs consensus
- **Short calls: -** BofA EPS estimates vs consensus
- **Short puts: +** BofA EPS estimates vs consensus

Positioning Score:

- **Long calls:** average[-(Fund holdings), +(Short interest)]
- **Long puts:** average[+(Fund holdings), -(Short interest)]
- **Short calls:** average[+(Fund holdings), -(Short interest)]
- **Short puts:** average[-(Fund holdings), +(Short interest)]

Aggregate Score is the average of *Implied vol Score*, *BofA EPS Score*, and *Positioning Score*.

Note: These screens are intended to be an indicative metric only and may not be used for reference purposes or as a measure of performance for any financial instrument or contract, or otherwise relied upon by third parties for any other purpose, without the prior written consent of BofA Global Research. These screens were not created to act as benchmarks.

Options Risk Statement

Potential Risk at Expiry & Options Limited Duration Risk

Unlike owning or shorting a stock, employing any listed options strategy is by definition governed by a finite duration. The most severe risks associated with general options trading are total loss of capital invested and delivery/assignment risk... all of which can occur in a short period.

Investor suitability

The use of standardized options and other related derivatives instruments are considered unsuitable for many investors. Investors considering such strategies are encouraged to become familiar with the "Characteristics and Risks of Standardized Options" (an OCC authored white paper on options risks). U.S. investors should consult with a FINRA Registered Options Principal.
For detailed information regarding risks involved with investing in listed options:
http://www.theocc.com/about/publications/character-risks.jsp

Price objective basis & risk

Booking Holdings Inc (BKNG; B-1-7; $4140.60)

Our price objective is $6,000, based on 20x our 2027E EPS + Cash, which compares to Booking's 10-year historical range of 10-24x. We think a forward P/E multiple premium to OTA peers is appropriate given higher quality of earnings, market share growth and strong FCF generation.

Risks to our PO are: 1) a global economic downturn or Global conflicts that reduce travel activity, 2) competition for traffic from Google lowering growth or margins, 3) hotels favoring their own distribution channels, 4) FX volatility, and 5) increased competition from Airbnb, Expedia, and Trip.com. The stock has been subject to heavy volatility in the past based on travel disruptions and this volatility could increase given global conflicts.

Cadence (CDNS; B-1-9; $299.46)

Our $400 PO is based on 44x CY27E P/E, in upper half of historical 30x-54x trading range and justified in our view given the strategic importance of EDA in an increasingly fragmented global electronics supply chain.

Downside risks are: (1) Share loss in existing markets to primary competitors, (2) a broader economic downturn dampens semis R&D spending and corresponding spend on EDA tools and services, (3) escalation of US-China trade war limits CDNS' ability to sell to key customers, (4) semiconductor industry consolidation accelerates which could diminish customer spending power, (5) venture into adjacent system analysis market fails to meaningfully accelerate revenue growth and incremental investments suppress margin expansion.

DoorDash (DASH; C-1-9; $160.34)

Our PO of $260 is based on our SOTP valuation analysis for: 1) Profitable US Restaurant EBITDA, and 2) still unprofitable combined new verticals and International asset GOV. We apply a 15x 2027E EBITDA multiple to our $4.9bn in 2027E Restaurant EBITDA. Our 2027 Restaurant EBITDA multiple is in-line with FANG+Uber at 15x, despite our high long-term EBITDA growth expectations for DASH's core restaurant business. With a much more nascent stage for New Verticals + Int'l, we apply a 0.7x GOV multiple to our $51bn in 2027E New Verticals GOV. Long-term, we believe margins for New Verticals, especially the Intl restaurant business, can be comparable to US Restaurant margins. Our SOTP valuation gets to a Restaurant Valuation of $74bn, and a New Verticals valuation of $36bn.

Downside risks are 1) slowing industry growth, which could put premium valuations at

risk, 2) added platform, software and AV investments that pressure margins and earnings growth, 3) strong competitive from Uber, and entrenched incumbents in adjacent categories (including Amazon), 4) Uncertainty on long term margins for non-US restaurant business.

Analyst Certification

We, Justin Post, Paula Andrea Soto, CFA and Vivek Arya, hereby certify that the views each of us has expressed in this research report accurately reflect each of our respective personal views about the subject securities and issuers. We also certify that no part of our respective compensation was, is, or will be, directly or indirectly, related to the specific recommendations or view expressed in this research report.

Equity Investment Rating Distribution: Technology Group (as of 31 Dec 2025)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	208	54.03%	Buy	106	50.96%
Hold	97	25.19%	Hold	44	45.36%
Sell	80	20.78%	Sell	23	28.75%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2025)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	1869	53.99%	Buy	1069	57.20%
Hold	834	24.09%	Hold	481	57.67%
Sell	759	21.92%	Sell	383	50.46%

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2]Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: Booking Holdings, Cadence, DoorDash.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Booking Holdings, DoorDash.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Booking Holdings, Cadence, DoorDash.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Booking Holdings, Cadence, DoorDash.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Booking Holdings, Cadence, DoorDash.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Booking Holdings, Cadence, DoorDash.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Booking Holdings, Cadence.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Booking Holdings, Cadence, DoorDash.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Booking Holdings, Cadence, DoorDash.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
Refer to BofA Global Research policies relating to conflicts of interest.
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

Futures and options are not appropriate for all investors. Such financial instruments may expire worthless. Before investing in futures or options, clients must receive the appropriate risk disclosure documents. Investment strategies explained in this report may not be appropriate at all times. Costs of such strategies do not include commission or margin expenses.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
