

Streamlining your business processes.

Graybar supports our customer's e-procurement initiatives by interfacing with a variety of ERP systems, software providers and marketplaces. We support system-to-system integration. Graybar utilizes EDI, XML and other proprietary data formats to exchange business information and documents with our customers.

Key Features

- Graybar has a dedicated team ready to deploy these initiatives
- Full purchasing cycle including orders, quotes, order confirmation and invoices
- Flexibility within our systems to format data as required by customer
- Supports your transmission methods including VAN, FTP, SFTP, internet and email
- Graybar supports business processes including but not limited to:
 - » Planning schedule with release capability
 - » Request for quotation
 - » Customer purchase order
 - » Purchase order acknowledgement
 - » Advanced shipping notice
 - » Customer change order
 - » Graybar invoice
 - » Electronic Funds Transfer
 - » System data acknowledgement
 - » Rejection notice
 - » Response to quote

Customer Benefits

- Reduces total acquisition costs by improving operational efficiencies
- Automates business transactions, allowing people to develop and enhance business relationships
- Speeds up business cycles
- Reduces or eliminate data entry errors
- Promotes Just in Time (JIT) ordering
- Reduces your processing costs

System Requirements

- Ability to support file transfer such as but not limited to:
 - » Communication software
 - » Mapping and translation software

Graybar Sustainability

According to the EPA paper and paperboard make up the largest percentage, 28.5% of municipal waste. By utilizing electronic business data interchange technology the amount of paper used for business process can be reduced. Not only does EDI streamline business, thus saving money, but it reduces our impact on the environment.
